FAQ - Looking to protect your employees from the flu?

Visit our Boise location and get your flu shot or let us come to your company with our on-site flu vaccination clinic and take a proactive approach at protecting your bottom-line.

Call Ladd Family Pharmacy to schedule your company flu clinic: 208-947-0877

Ladd Family Pharmacy's Travel Clinic offers company flu immunization that is completely hassle-free for your company and your employees. More information available at www.flu.laddfamilyrx.com.

How can companies benefit from offering employees flu shots?

Each and every year companies are affected financially by the flu season. In order for your company to succeed during this time of the year, it is imperative to set up preventive measures to combat the flu and its damaging consequences. By partnering with Ladd Family Pharmacy to offer flu immunization, you can substantially save money from employees that take sick leave time. Making yearly flu vaccination available to your employees will also help reduce absenteeism, as employees sick with the flu tend to miss more days of work per season. Your company can also save on production time, as well as improving productivity since employees are healthy. Finally, you can show your employees how important they are by providing them this added benefit at the workplace.

Where can the flu vaccine be administered?

Ladd Family Pharmacy can administer flu vaccines to patients that visit our 1109 S. Broadway Ave location. We also offer the convenience of having our board certified staff coming to your company and provide on-site flu shots to your entire staff. Companies should take advantage of our on-site flu vaccination clinic, which can help them save money, as well as employee time. *Please note that in order for Ladd Family to provide on-site flu vaccine to your company, certain criteria must be met- the destination, day and time, and a reasonable number of employees (minimum of 10) requesting vaccination.* All services rendered are on a contractual basis. Our office will try its best to accommodate your business schedule and needs. For further clarification, contact the pharmacy.

How much will the employees be charged for the flu vaccination?

There are no out of pocket costs if the service can be billed through the employer's pharmacy service benefit for the administration of the flu vaccine. Otherwise, \$25 is the cost per seasonal flu vaccine. Flu vaccination administration whether at our pharmacy or through our on-site flu vaccine clinic, will be done on a contractual basis. Your company representative should contact our staff and discuss prices, as well as making all the arrangements before providing any services.

- **How can corporations arrange for flu vaccination with Ladd Family Pharmacy?**

Employees visiting the pharmacy can drop in any time. They should notify the pharmacy staff about their company association and we will make sure they are properly served. If your company decides to choose our flu on-site

immunization, then please call ahead of time to discuss the necessary preparations to run an effective and successful on-site flu vaccination clinic. Our friendly staff is available by email or phone to assist you if you do have any questions about scheduling. To create an online signup sheet for your group there is a free site called www.mysignup.com that is easy to use. It can streamline the scheduling process for employees. Using 30 flu shots administered per hour is a good estimate for scheduling. We can schedule more than 1 certified pharmacist for larger groups. Note: each employer needs to provide a person to assist with paperwork and payment during the entire clinic. Employers are responsible for printing the vaccination information sheet and consent form (downloadable from our website at www.flu.laddfamilyrx.com).

What are the payments methods offered for flu immunization by Ladd Family Pharmacy?

There are several payment options: we can bill your company's pharmacy service benefit after the administration of the flu vaccine (no additional payment from employer), your company can cover a percentage of the cost while making your employee responsible for the remainder of the fee, or employees can be solely responsible for payment at the time of service. In the latter cases, we accept check or cash. In the event of requesting our on-site flu vaccine clinic, your company will have to make a minimum guaranteed payment equivalent to the minimum people per hour of 10 flu vaccines equating to \$250 either by check or credit card to secure our services. *Note: state agencies are exempt from the minimum guarantee.* If the minimum per hour is reached during the actual clinic the amount in full is refunded (when using employer pharmacy service benefit) or used proportionally towards the \$25 per vaccine cost. This payment is necessary, as flu vaccines will have to be reserved for your company, thus making them not available to other patients.

We can bill insurance for most compounded medications
